Cohen & Gresser plans to open a Dubai office in 2025, which will represent a key milestone in our strategic growth and strengthen our ability to offer world-class, cross-border legal services.

Located in the Dubai International Financial Centre (DIFC), the office will provide strategic counsel for clients engaged in the UAE's dynamic market, covering both transactional and dispute-related matters. It will also connect clients with a UAE presence to our litigation and regulatory expertise in the U.S., the UK, France, and Europe in general.

To be led by managing partner [Johannes Jonas](#), the office will be committed to providing businesses, investors, and stakeholders with access to our global expertise. From corporate transactions and regulatory matters to cross-border disputes, we will deliver practical solutions to help clients navigate complex legal challenges across international markets.

The Dubai office will enhance our ability to serve existing clients in the region and create new opportunities to partner with clients who value our commitment to excellence and innovation.
